Participation, data protection and data processing

Action Research: Mobility of teenagers in aspern Seestadt

Participation Sounding Board

Your personal code¹: _____

As an academic institution, data protection is a key concern for us - especially when surveying underage participants. We only collect and process the data that is necessary to achieve the intended research purposes and always endeavour to ensure the security and accuracy of the data. Personal data is therefore processed in strict compliance with the principles and requirements set out in the GDPR (General Data Protection Regulation), the Austrian Data Protection Act (DSG) and the Research Organisation Act (FOG).

General information on the action research

We want to find out more about the mobility behaviour and mobility needs of teenagers in **aspersn** Seestadt. Therefore, we are interested in which means of transport are particularly popular with teenagers, which routes they choose and where they (do not) like to spend time in the Seestadt. Further information on the action research can be found here: <https://www.mobillab.wien/en/teenagers/>

The study was commissioned by [Wien 3420 aspern Development AG](#) (financed by the **aspersn** Mobility Fund), which is responsible for infrastructure and urban development in **aspersn** Seestadt. The findings will influence future planning in Seestadt and may also inspire other districts to take better account of the wishes and needs of young people in their urban and transport planning.

Participation

You can take part in three parts of the action research: As part of the sounding board, in the online survey and as part of the workshop.

The so-called **sounding board** consists of four to five teenagers who will assist us in conducting, analysing and interpreting the results. The teens are also invited to present the results together with us. Participation is voluntary. As a thank you for their commitment, all sounding board participants will receive a € 10 voucher for a shop in **aspersn** Seestadt.

¹ Your personal code (6 digits) consists of the **first two letters of your first name** (e.g. Céline), your **birthday** (e.g. 24.01.2010) and the **last two digits of your mobile phone number** (...709) → CE2409. .

As a sounding board member the following data protection aspects are important for you:

- **Personal data:** We need your name, age, and contact details to conduct the sounding board.
- During the collaboration, we will get to know you better. The **conversations** (e.g. personal experiences or opinions) will influence the study and make it better. Your comments that are useful for the action research will be pseudonymised. This means that other people cannot draw any conclusions about you.
- **Documentation (process, content):** Where appropriate, work phases / interim results are recorded in the form of photos. We use these for our internal project documentation. Here, too, we naturally respect the data protection laws. No photos of you in which you are recognisable will be published without the additional consent. All persons (faces) are pixelated/obscured for publications (such as the final report with the results) so that the persons are not recognisable.
- **Results:** The results are published pseudonymised so that no conclusions can be drawn about you individually.
- All **project staff involved** are subject to a duty of confidentiality and are obliged to maintain data secrecy.

Further information on data protection and data processing:

<https://www.mobillab.wien/en/mobilitystudy-youth-data-protection-declaration/>

You can refuse or withdraw your consent at any time without giving reasons. You have the right to information, rectification, erasure, restriction of processing and data portability. Withdrawal or refusal has no negative consequences for you. You can send your revocation of consent by e-mail to the contact person listed below. All your personal data will then be deleted immediately.
