

## Declaration of consent by parent/guardian Participation, data protection and data processing

Action Research: Mobility of teenagers in aspern Seestadt

Participation Workshop

Your personal code<sup>1</sup>: \_\_\_\_\_

As an academic institution, data protection is a key concern for us - especially when surveying underage participants. We only collect and process the data that is necessary to achieve the intended research purposes and always endeavour to ensure the security and accuracy of the data. Personal data is therefore processed in strict compliance with the principles and requirements set out in the GDPR (General Data Protection Regulation), the Austrian Data Protection Act (DSG) and the Research Organisation Act (FOG).

### General information on the action research

We want to find out more about the mobility behaviour and mobility needs of teenagers in **aspersn** Seestadt. Therefore, we are interested in which means of transport are particularly popular with teenagers, which routes they choose and where they (do not) like to spend time in the Seestadt. Further information on the action research can be found here: <https://www.mobillab.wien/en/teenagers/>

The study was commissioned by [Wien 3420 aspern Development AG](#) (financed by the **aspersn** Mobility Fund), which is responsible for infrastructure and urban development in **aspersn** Seestadt. The findings will influence future planning in Seestadt and may also inspire other districts to take better account of the wishes and needs of young people in their urban and transport planning.

### Participation

Teenagers can take part in three parts of the action research: As part of the sounding board, in the online survey and as part of the workshop.

Around 30 adolescents will take part in the **workshop**. The workshop is a thematic consolidation of the previous online survey. In about three hours, we will talk about the mobility needs, mobility wishes and mobility behaviour of teenagers. Participants will have the opportunity to express their opinions

---

<sup>1</sup> Your personal code (6 digits) consists of the **first two letters of your first name** (e.g. Céline), your **birthday** (e.g. 24.01.2010) and the **last two digits of your mobile phone number** (...709) → CE2409. .

and contribute their personal experiences. Participation is voluntary. As a thank you for their contribution, all workshop participants will receive a € 10 voucher for a shop in **aspermobil** Seestadt.

The following data protection aspects are to be taken into account for participation in the workshop:

- **Personal data:** We need the participants' name, age, gender and contact details for the execution of the workshop.
- **Information on mobility behaviour and leisure activities:** During the collaboration, we will get to know your child better. The **conversations** (e.g. personal experiences or opinions) will influence the study and improve the study's quality.
- **Documentation (process, content):** Where appropriate, work phases / interim results are recorded in the form of photos and audio recordings. We need these for our internal project tasks and for the thorough evaluation of the many verbal statements. Here, too, we naturally respect the data protection of the teenagers. No photos of the participants in which the participants are recognisable will be published without the additional consent of their legal guardian(s). The persons (faces) are pixelated/obscured for publications (such as the final report with the results) so that the person is not recognisable. The audio recordings are only used internally, are not passed on and are stored / deleted in accordance with data protection regulations on the TU Wien cloud.
- **Results:** The workshop is analysed using maps and the MAXQDA computer programme, which functions are ideally suited to our study design. The results are published pseudonymised so that no conclusions can be drawn about a child / the children.
- All **project staff involved** are subject to a duty of confidentiality and are obliged to maintain data secrecy.

Further information on data protection and data processing:

<https://www.mobillab.wien/en/mobilitystudy-youth-data-protection-declaration/>

You can refuse or withdraw your consent at any time without giving reasons. You have the right to information, rectification, erasure, restriction of processing and data portability. Withdrawal or refusal has no negative consequences for you or the minor child. You can send your revocation of consent by e-mail to the contact person listed below. All your personal data and that of the minor child will then be deleted immediately.
